PULPO for 3PL

PULPO WMS

Revolutionize the way you manage your warehouse with the WMS from PULPO

As a 3PL company, you're in the eye of a storm every day. You navigate the maze of diverse customer demands, striving to keep a clear view of inventory across multiple sales channels. The pressure to onboard new workers swiftly, minimize errors, and speed up order processing is relentless. Amidst all this, you're tasked with providing transparent, automated billing. It's a high-stakes juggling act, balancing efficiency, accuracy, and scalability in the fast-paced world of warehousing.

Imagine a world where you have all your customers and their integrations under one roof. With PULPO's 3PL feature, you can effortlessly scale operations, streamline warehousing, and enhance overall efficiency. Say goodbye to the chaos of multiple systems and hello to clear inventory visibility, swift onboarding, and error-free processes. PULPO is your ticket to more organized, efficient, and profitable warehouse operations.

> " With PULPO we have the possibility to manage inventory and share it transparently with our online-retailer customers.
>
> Amir El-Moawen, CEO & Founder, Click & Pack Fulfillment

Streamlined operations, increased efficiency and management of multiple customers under one roof.

PULPO WMS

Unified Management

Manage logistics and inventory for multiple merchants, channels, and customers under one roof, simplifying operations and reducing complexity.

Route Optimization

Enhance picking efficiency up to 3x and deliver unrivaled productivity compared to other alternatives.

Billing Reporting

Generate billing reports that make it easy for 3PL companies to create accurate invoices for their clients.

Merchant Center

Provide customers with full transparency of their inventory, fulfillment status, and sales orders.

Analytics Suite

Monitor every process and precisely measure the duration of customer engagement down to the second.

Integrations

Integrate e-commerce platforms, ERPs, and shipping techs easily. Custom integrations are possible too.
